IN THE CLAIMS

1. (currently amended) A method of WWW page retrieval from a web site, comprising:

entering information associated with a content of the site, which information is not a WWW address or a portion thereof, which entering comprises typing by a user;

providing said information to a software not associated with said site;

providing a page address of a page of said site, responsive to said entered information, by said software;

retrieving said page responsive to said page address; and

directly displaying said page, using a browser, without any additional user intervention, beyond said entering,

wherein said information is entered in a non-Latin language.

2. (original) A method according to claim 1, comprising providing user-dependent information and wherein providing a page address comprises analyzing said information using said user-dependent information.

3. (currently amended) A method according to any of the preceding claimsclaim 1, wherein providing a page address comprises selecting a URL from a translation table in which said information is a unique index.

4. (re-presented) A method according to any of claims 1-2claim 1, wherein said page address is determined using a database of associations.

5. (original) A method according to claim 4, wherein said database is at least logically associated with a particular user.

6. (original) A method according to claim 5, wherein said database includes information regarding a particular user, which information is entered by said user, which page is selected for display responsive to said information and wherein said database is stored at a location remote from where the information is entered for display of said page.

2

7. (currently amended) A method according to claim 4 ~~or claim 5~~, wherein said database comprises at least one association which is particular to said particular user.

8. (original) A method according to claim 7, wherein analyzing comprises analyzing responsive to said at least one association.

9. (currently amended) A method according to ~~any of claims 7-8~~claim 7, wherein said at least one association is entered by said particular user.

10. (currently amended) A method according to ~~any of claims 7-9~~claim 7, wherein said at least one association is automatically generated responsive to a selection of a WWW page, from a plurality of suggested pages, by said particular user.

11. (original) A method according to claim 7, wherein at least one association in said database is automatically generated responsive to a selection of a particular WWW page, from a plurality of suggested pages, by a plurality of users.

12. (currently amended) A method according to claim 4 ~~or claim 5~~, wherein said database is at least logically associated with a translation server, which utilizes said database for translation.

13. (currently amended) A method according to ~~any of claims 5-12~~claim 5, wherein said at least logical association comprises a physical association.

14. (currently amended)~~(original)~~ A method of WWW page retrieval from a web site, comprising:

entering information associated with the content of the site, which information is not a WWW address or a portion thereof, which entering comprises typing by a user;

providing said information to a software not associated with said site;

analyzing said information using user-dependent information;

providing a page address of a page of said site, responsive to said entered information and said analysis, by said software;

retrieving said page responsive to said page address; and

3

directly displaying said page, using a browser, without any additional user intervention, beyond said entering.

15.   (currently amended) A method according to ~~any of the preceding~~ claims 14, wherein providing comprises providing responsive to a geographical location at which said information is entered.

16.   (currently amended) A method of WWW page retrieval from a web site, comprising:
entering information associated with the content of the site, which information is not a WWW address or a portion thereof, which entering comprises typing by a user;
providing said information to a software not associated with said site;
analyzing said information responsive to a geographical location at which said information is entered;
providing a page address of a page of said site, responsive to said entered information and said analysis, by said software;
retrieving said page responsive to said page address; and
directly displaying said page, using a browser, without any additional user intervention, beyond said entering.

17.   (currently amended) A method according to ~~any of the preceding claims~~claim 16, wherein said information is entered by a user in a same way in which a standard URL would be entered.

18.   (original) A method according to claim 17, wherein said information is entered into a URL entry field in said browser.

19.   (currently amended) A method according to claim 1-16, wherein said information is entered into a window overlaying said browser.

20.   (original) A method according to claim 19, wherein said window is overlaying a location window of said browser.

21.   (currently amended) A method of WWW page retrieval from a web site, comprising:

4

entering information associated with the content of the site, which information is not a WWW address or a portion thereof, which entering comprises typing by a user;

providing said information to a software not associated with said site;

providing a page address of a page of said site, responsive to said entered information, by said software;

retrieving said page responsive to said page address; and

directly displaying said page_, using a browser, without any additional user intervention, beyond said entering,

wherein said information is entered into a URL, entry field in said browser.

22. (re-presented and currently amended) A method according to ~~any of claims 14, 16 or 21~~ claim 14, wherein said information is in a non-Latin language.

23. (re-presented and currently amended) A method according to ~~any of claims 1-22~~ claim 1, wherein said information does not meet domain name specifications.

24. (re-presented and currently amended) A method according to ~~any of claims 1-23~~ claim 1, wherein said information does not meet URL specifications.

25. (re-presented and currently amended) A method according to ~~any of claims 1-24~~ claim 1, wherein said information comprises a plurality of words.

26. (re-presented and currently amended) A method according to ~~any of claims 1-24~~ claim 1, wherein said information comprises a field identifier and a field-match value.

27. (re-presented and currently amended) A method according to ~~any of claims 1-24~~ claim 1, wherein said information is associated with an owner of the site.

28. (re-presented) A method according to claim 27, wherein said information comprises a partial street address of said owner.

29. (re-presented) A method according to claim 27, wherein said information comprises a telephone number of said owner.

5

30.   (re-presented and currently amended) A method according to ~~any of the preceding claims~~claim 1, comprising analyzing said information to determine a single translation thereof.

31.   (re-presented) A method according to claim 30, wherein analyzing comprises correcting spelling in said information.

32.   (re-presented) A method according to claim 31, wherein correcting spelling comprises correcting for at least one transliteration error.

33.   (re-presented and currently amended) A method according to ~~any of claims 30-32~~claim 30, wherein analyzing comprises applying natural language recognition on said information.

34.   (re-presented and currently amended) A method according to ~~any of claims 30-33~~claim 30, wherein analyzing comprises blocking access to certain types of sites.

35.   (re-presented and currently amended) A method according to ~~any of claims 30-33~~claim 30, wherein said translation comprises a only domain name.

36.   (re-presented) A method according to claim 35, wherein said translation comprises a URL.

37.   (re-presented and currently amended) A method according to ~~any of claims 30-13~~claim 30, wherein said analyzing is performed locally, where said page is displayed.

38.   (re-presented and currently amended) A method according to ~~any of claims 30-13~~claim 30, wherein said analyzing is performed remotely from where said page is displayed.

39.   (re-presented and currently amended) A method according to ~~any of claims 30-38~~claim 30, wherein said analyzing comprises determining a one-to-one mapping between said information and a translation.

40. (re-presented and currently amended) A method according to ~~any of the preceding claims~~ claim 1, wherein said information is entered in a language not supported by said browser.

41. (re-presented and currently amended) A method according to ~~any of the preceding claims~~ claim 1, wherein said information is entered in a font not supported by said browser.

42. (re-presented and currently amended) A method according to ~~any of the preceding claims~~ claim 1, wherein directly displaying said page, comprises automatically providing password information for accessing said page.

43. (re-presented) A method according to claim 42, wherein a plurality of such passwords are stored in a password database associated with said user.

Claims 44-84 (previously canceled)

85. (re-presented) A method of e-mail addressing, comprising:

entering an incorrect e-mail address, which does not form an alias, a portion or a nickname of a valid e-mail address;

automatically correcting said address, using information at a first, remote, location; and

sending an e-mail message to a second remote location, via an Internet, using said corrected address.

86. (original) A method according to claim 85, wherein said incorrect e-mail address comprises information associated with a desired e-mail addressee.

87. (original) A method according to claim 86, wherein said information comprises at least a portion of a geographical address.

88. (original) A method according to claim 86, wherein said information comprises at least a portion of a telephone number.

89. (new) A method of WWW page retrieval from a web site, comprising:

7

entering one or more words into a browser program, the one or more words not comprising a WWW address or a portion thereof, which entering comprises typing by a user;

providing said one or more words to software at a first location other than the location of said browser;

providing a page address of a page stored at a second location, responsive to said entered one or more words, by said software;

retrieving said page stored at a second location responsive to said page address; and

directly displaying said page, using said browser, without any additional user intervention, beyond said entering; wherein

providing the page address of the page stored at the second location comprises performing an automated web search.

90. (new) A method according to claim 89 wherein providing said one or more words comprises providing only one word.

91. (new) A method according to claim 1, wherein providing the page address, comprises performing an automated web search.

92. (new) A method according to claim 14, wherein providing the page address, comprises performing an automated web search.

93. (new) A method according to claim 16, wherein providing the page address, comprises performing an automated web search.

94. (new) A method according to claim 21, wherein providing the page address, comprises performing an automated web search.

95. (new) A method according to claim 1, wherein said providing the page address comprises retrieving information about a site from a location, and comprising updating of said information by an operator of said site.

96. (new) A method according to claim 16, wherein said information is in a non-Latin language.

8

97. (new) A method according to claim 21, wherein said information is in a non-Latin language.

98. (new) A method according to claim 85, wherein said information is in a non-Latin language.

99. (new) A method according to claim 89, wherein said information is in a non-Latin language.

100. (new) A method according to claim 1, wherein said information is entered into a URL entry field in said browser.

101. (new) A method according to claim 14, wherein said information is entered into a URL entry field in said browser.

102. (new) A method according to claim 21, wherein said information is entered into a URL entry field in said browser.

103. (new) A method according to claim 89, wherein said information is entered into a URL entry field in said browser.

104. (new) A method according to claim 1, wherein providing a page address comprises providing responsive to a popularity level of said page.

105. (new) A method according to claim 1, wherein providing a page address comprises providing based upon statistical information correlating said entered information and websites.

106. (new) A method according to claim 1, including adding a user interface functionality to said browser, which functionality is used for interaction with said site.

107. (new) A method according to claim 106, wherein said interface comprises icons.

108.   (new) A method according to claim 106, wherein said interface comprises one or more menus.

109.   (new) A method according to claim 106, wherein said functionality comprises a purchase function.

110.   (new) A method according to claim 106, wherein said functionality operates based on information stored in a database.

111.   (new) A method according to claim 109, wherein said database contains information arranged by site.
